SUMMARY

I am Aspiring developer specializing in Web and Game Development with proficiency in C#, HTML, CSS, JavaScript, and Unity. Experienced in creating engaging gameplay concepts and collaborating effectively with teams to deliver high-quality design work that meets project guidelines and expectations.

EXPERIENCE

Unity Game Engine Intern 06/2024 – 07/2024
EBTS Organization

- Developed **3+ interactive prototypes** using Unity AR/VR core fundamentals, focusing on asset management and C# scripting.
- Mastered scene setup and optimization workflows, resulting in a measurable reduction in prototype load times during testing.

Machine Learning Intern 04/2025 – 05/2025
E-Train

- Collaborated in a 5-member team to build a predictive model using diverse real-life datasets, **improving data processing efficiency by approximately 20%**.
- Performed feature analysis and model evaluation to solve practical technical challenges, delivering results to stakeholders.

EDUCATION

B.Tech in Computer Science Engineering 08/2022 – 07/2026
Integral University - Lucknow
GPA: 7.9/10

Intermediate (Class XII) 01/2021 – 12/2021
St. Mary Inter College - Etawah, India
GPA: 7.7

PROJECTS

FIFA World Cup Database Portal | *HTML, CSS, JS* [GitHub](#)

- Engineered a web interface using **HTML5 and CSS3** to visualize historical data, achieving **100% responsive design** across platforms.
- Organized complex tournament datasets into intuitive UI components to enhance data accessibility.

Sport Store E-commerce Website | *C#, CSHTML, CSS, JS* [GitHub](#)

- Architected a dynamic full-stack solution utilizing **C# and CSHTML** for server-side logic and modular rendering.
- Developed functional shopping cart and user authentication modules, effectively managing state transitions.

Animal Matching Game | *C#, .NET MAUI, XAML* [GitHub](#)

- Developed a cross-platform mobile application using **.NET MAUI**, implementing an asynchronous game loop to manage real-time user interactions.
- Engineered a pattern-recognition engine where users identify identical entities to trigger **time-extension rewards**, balancing game difficulty through dynamic time-scaling logic.
- Utilized **MVVM architecture** to decouple game logic from the UI, ensuring smooth rendering and responsive touch events under time-constrained conditions.

SKILLS

- Languages:** C, C++, C#, Python, JS, SQL
- Frameworks & Engines:** Unity Engine, .NET MAUI
- Web:** HTML5, CSS3, Bootstrap, React JS
- Tools:** Git, GitHub, VS Code, Jupyter, Pandas
- Soft Skills:** Creative Writing, Critical Reading, Narrative design, Prompt Engineering

CERTIFICATIONS

Digital credentials and verification proofs are available in my [GitHub Certification Repository](#).

- RPG in Unity (Brackeys/Cursa)
- Start Writing Fiction (The Open University)
- Creative Writing (The Open University)
- Problem Solving (HackerRank)
- Data Structure (Great Learning)
- Unity VR/AR (EBTS)
- Front End HTML (Great Learning)
- Web Design (Great Learning)
- BI (IBM)
- Predictive Analysis (IBM)
- Python Basic (HackerRank)
- JavaScript Basic (HackerRank)
- SQL Basic (HackerRank)
- Intro to Generative AI (UpGrad)
- Advanced Prompt Eng. (UpGrad)
- ReactJS for Beginners (Simplilearn)
- Advanced Git Concepts (Simplilearn)

LANGUAGES

- Hindi:** Fluent
- English:** Intermediate
- Japanese:** Beginner
